

MITOCHONDRIA IN THE PATHOGENESIS OF DISEASES

Introduction to Guest Editor - Dr. Tsung-I Peng

We wish to thank Dr. Tsung-I Peng for serving as the guest editor. The group of authors who have contributed articles to this issue “Mitochondria in the Pathogenesis of Disease” are outstanding experts in their field.

Dr. Peng graduated from Kaohsiung Medical University in 1983 and earned his master degree of neuroscience in 1990 and PhD in 1994 from University of Rochester, New York, U.S.A. Subsequently, he received one year post-doctor training in the Department of Neurology in the same university, and another year of neurology training in Emory University and then served as a associate faculty for two years (1996-1998).

Dr. Tsung-I Peng

Dr. Peng returned to Taiwan and completed his residency in neurology in Chang Gung Memorial Hospital in 1999.

Currently, Dr. Peng is an associate Professor at College of Medicine, Chang Gung University and serving as the chief of division of neurology at Keelung branch of Chang Gung Memorial Hospital since 2005.

Dr. Peng’s research interest mainly focuses on mitochondrial dysfunction, and clinical neurology. He has been academically active, published more than 30 articles in various journals and read many abstracts in the international conferences.
